Part (e) temperature function

Part (e) vibration

Part (f) availability function

Pseudo codes

Part (e)

```
START
FUNCTION get_temp_status(temp)
  IF temp > 100 THEN
    RETURN "CRITICAL"
  ELSE IF temp >= 80 THEN
    RETURN "WARNING"
  ELSE
    RETURN "NORMAL"
END
```

Part(e)

```
START
FUNCTION get_vib_status(vib)
  IF vib > 8 THEN
    RETURN "CRITICAL"
  ELSE IF vib >= 5 THEN
    RETURN "WARNING"
  ELSE
    RETURN "NORMAL"
  END IF
END
```

Part(f)

```
START
FUNCTION get_availability(operating, downtime)
  availability = operating / (operating + downtime) * 100
  RETURN availability
END
```
